

data sheet:

4-Post Shelving

Features

Maximize your storage capacity by increasing linear filing inches in less space

Speed access to files and other stored material

Relocate with ease as your storage needs change

Level system without removing stored material

Expand the system seamlessly as you grow

Mobile Cabinet Solutions

If you want to make your TAB 4-Post Shelving even more efficient, put our SIDE-TRAC mobile system to work. SIDE-TRAC is ideal for high-density storage environments. Shelving is arranged in two compact rows, eliminating traditional aisle space. The front row glides from side-to-side, allowing access to the back row. Access is created only when and where it's needed.

Save Floor Space and Search Time

With our SIDE-TRAC system, you get more files in less space. And because shelving is just a few steps apart, search time is reduced as well, saving you time and money

Use any TAB 4-Post Shelving

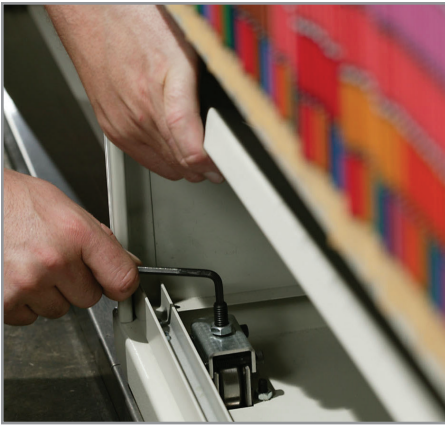

No matter what media you store, TAB 4-Post Shelving will store anything that fits on 9", 12" or 15" deep shelves. Multiple widths of 30", 36", 42" or 48" provide maximum storage capacity and will quickly adapt to SIDE-TRAC.

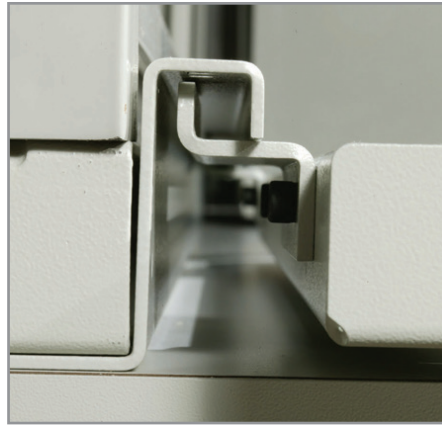

Easy to Install, Stable, and Safe

The SIDE-TRAC factory-built deck is not attached to the floor making it easily installed and leveled on existing surfaces. The system can be expanded or relocated as your storage requirements change. The interlocking deck sections feature built-in leveling glides, preventing unwanted shelving "drift" caused by floor irregularities. TAB's anti-tip mechanisms are simple, effective and unobtrusive. All SIDE-TRAC comes with floor level anti-tip, optional overhead anti-tip can be ordered separately.
