SIDE-TRAC

Mobile cabinet solutions

If you want to make your TAB cabinets even more efficient, put our SIDE-TRAC mobile system to work. SIDE-TRAC is ideal for high-density storage environments. Cabinets are arranged in two compact rows, eliminating traditional aisle space. The front row glides from side-to-side, allowing access to the back row. Access is created only when and where it's needed.

Save floor space and search time

With our SIDE-TRAC system, you get more files in less space. And because cabinets are just a few steps apart, search time is reduced as well. SIDE-TRAC adds only two inches to the overall cabinet height. No bulky carriages are required because wheels bolt directly into existing cabinet bases.

Use any TAB cabinet

No matter what media you store, TAB has the right cabinet for you. And every TAB cabinet quickly adapts to SIDE-TRAC, without bulky carriages or awkward overhead safety equipment.

Pair a SIDE-TRAC system with:

- Spacefinder (Datafile) Cabinets, ideal for storing letter or legal-size files
- Designer series cabinets, created for your unique storage needs

Benefits

Easy to move and reassemble

Quick access to files and other stored material

Allows for seamless expansion as your filing needs grow

Ideal for adding filing space and mobilizing existing cabinetry

Increase linear filing inches with less space for high-density storage capacity

Easy to Install, Stable, and Safe

The SIDE-TRAC factory-built deck is easily installed and leveled on existing floor surfaces. The system can be expanded or relocated as your storage requirements change. The interlocking deck sections feature built-in leveling glides, preventing unwanted cabinet “drift” caused by floor irregularities. TAB’s anti-tip mechanisms are simple, effective and unobtrusive. Both mobile and stationary cabinets are fully stabilized.

Specifications

- Deck length configured to up to five cabinets per section
- Deck height adds 2” to overall cabinet height

Applications

- Decentralized file areas
- Binders, files, electronic media storage
- IT/network storage
- Secure storage

About TAB

TAB helps you save money, increase efficiency and reduce risk by streamlining the way you store, find and use business assets, paper files and electronic information. We offer filing systems and supplies (including custom folders and labels), high-density storage products, document scanning and indexing, and specialized software to manage records and inventories, and improve document-intensive business processes. Since 1950, we have served clients across North America in a diverse range of industries including government, healthcare, legal, finance, and architecture and design.
