TAB-TRAC

High-Density Mobile Storage

Configurable as Your Needs Change

Available in manual and mechanical-assist options, this sturdy system is designed for life and can be configured to your exact specifications.

TAB-TRAC is an ideal solution for filing environments where high capacity, low access, and secure storage are required.

Visually Pleasing while Saving Space

TAB mobile systems offer a complete spectrum of design possibilities, with color and texture choices to create visual harmony in any environment. End panels are available in painted steel, laminated with either self-edge, t-edge radius-edge, or custom-edge treatments. Double-faced shelving is arranged in a "T" intersection to the wall, allowing you to create aisles only when and where you need them, eliminating the need for fixed aisles.

Benefits

Industry leading design and high-quality materials ensure system lasts for life

Built-in safety function complies with occupational safety and health regulations

Configurable to your specifications and adaptable as your office environment changes

Lockable, secure storage helps you meet privacy legislation requirements

Double your storage capacity

High-density, multimedia storage in one area

Specifications

Unit Dimensions

Height, width and depth are designed to client specifications. TAB-TRAC deck and carriages add 5¼" to the height of Low Profile storage systems and 7¼" to the height of High Profile storage systems.

Carriages

The double-flanged wheel design eliminates carriage de-railing and ensures easier guidance with no adjustment along the track. Neoprene gaskets along the track create a gap-free floor. Sealed, permanently lubricated bearings provide smooth carriage movement and maintain long life with minimal maintenance.

Track and Rail

TAB-TRAC deck, track and rail set the industry standard for strength and durability. TAB certified installers laser level the system to 1/16" and secure and support the track and rail with long lasting, non-shrink grout. Additionally, TAB certified installers use factory produced track spacers to evenly and accurately space track and rail, preventing wheel, carriage and rail wear over time.

Deck

Supported by steel channels and anchored into the sub-floor, the TAB-TRAC deck provides a flush walking surface free of tripping hazards. TAB-TRAC's deck is constructed of industrial grade particleboard for uniform thickness and strength. Ramp access makes the system ADA compliant.

Shelving

Use your existing shelving or select from one of the many TAB shelving or cabinet options. Shelving is secured to the carriages with vibration-resistant fasteners.

About TAB

As a recognized leader in the records and information management industry, we develop custom solutions that enable our customers to control, store and access critical information. We offer top quality filing systems, media storage equipment and specialists that solve complex records and information management challenges. With more than 65 years of experience, we serve clients in a variety of industries including legal, finance, healthcare, insurance, manufacturing, education and government. TAB-TRAC™ and POWER-TRAC™ are both registered trademarks of TAB Products Co LLC.

Operation

Manual

Manually operated storage systems are recommended for small offices where weight loads and retrieval rates are minimal. You simply move the carriage handle in the direction you want the system to move.

Mechanical-Assist

In larger settings, where carriages are longer and weight loads are greater, the mechanical-assist TAB-TRAC system is ideal. The system's gears do most of the work; you simply rotate the carriage handle and the system does the rest.

TAB's low profile mechanical carriages can maneuver up to 700 pounds per linear foot, making them ideal for light media such as letter and legal-size files. High-profile mechanical carriages can bear up to 1,000 pounds per linear foot, perfect for heavy media such as x-rays.

Electrical

When a TAB-TRAC system needs to move effortlessly, POWER-TRAC™ is the answer. One touch of the directional control button opens the aisle automatically. POWER-TRAC is ideal for environments where large amounts of material are stored, heavy materials are involved, and user access is frequent. The controller is designed for intuitive user operation. And, safety is engineered into this system. Safety sweeps stop carriage movement when an object is encountered. The sweep is located at foot level and extends the full length of the carriages on both sides. The entire POWER-TRAC system is UL listed and CSA certified.
