

Police Dept Property & Evidence Storage

Client Success Story

Industry: Local Government

Department: Police Department

Business Situation:

An urban Police Department in New England was faced with increases in arrests and convictions, putting a real squeeze on their space for evidence storage. They were looking for a storage solution that would achieve the following objectives:

1. Double their current evidence capacity.
2. Eliminate boxes and barrels sitting on the floor.
3. Store evidence in Rubber Maid containers on uniform shelves.
4. Utilize heavy duty shelving with easily adjustable shelves.
5. Bar code all evidence to shelf locations.

TAB Solution

After TAB met with them initially, we were able to identify their needs. Our final proposal included the following solutions:

1. Implement mechanical assist mobile storage systems (1 system for their Gun Room, 2 systems for the Homicide Rooms, 1 system for their Evidence Room, and 1 system for their Drug/Cash Room).
2. Utilize uniform industrial clip shelving throughout all systems.

Business Benefits/ Results:

Once the mechanical assist mobile systems were installed with the uniform industrial shelving, the police department experienced the following results:

- Evidence capacity was doubled in (4) existing rooms (Guns, Drugs, Property Evidence, and Homicide Evidence) to allow for future growth potential.
- Evidence was consolidated and organized by year for faster purging and destruction.

- All evidence is now stored on uniform industrial clip shelving (24" deep) with easily adjustable shelves to allow for uniform Rubber Maid containers.
- All evidence is now barcoded to specific shelf locations for ease of retrieval.

Feel free to contact TAB at usinfo@tab.com if you would like further information regarding this project.
